

MOHAMMED HOSSAM

Cloud DevOps Engineer | Software Developer

Egypt | +201203903315 | eng.mohammed.hossam22@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Junior DevOps Engineer with a great background in computer science and software development with experience in Linux system administration, Bash scripting, and networking fundamentals, experienced with AWS, and DevOps tools including Jenkins, Docker and Kubernetes. Skilled in automating tasks, maintaining CI/CD pipelines, and collaborating in Agile teams. Passionate about learning from senior engineers and optimizing workflows and expanding in DevSecOps career.

EDUCATION

Bachelor of Computer Engineering

Suez Canal University, Egypt

Sep 2020 – Jul 2024

GPA: 3.01 / 4.0

- Coursework: Secure Software Development, Database Systems, Operating Systems, Embedded systems security
- Executed professional projects focused on full stack web application development and cloud engineering

SKILLS

Technical core skills

- **Containerization:** Docker, Kubernetes, Docker Swarm, Docker Compose
- **CI/CD:** Jenkins, GitHub Actions, Argo CD
- **Cloud platform:** AWS
- **Version control:** Git
- **Web development:** NodeJS, Express JS, Next JS, API development, agile methodology
- **Scripting:** Bash, Python (Automation), YAML
- **Data engineering:** web scrapping
- **OS:** Linux administration
- **Database:** MySQL, MongoDB
- **Programming:** C, C++, Java, Python
- **Additional skills:** Network infrastructure configuration and security, Web pentesting (OWASP Top 10), Embedded software development and hardware integration

PROJECTS

- **CI/CD Pipeline :** Built an end-to-end GitOps CI/CD pipeline (GitHub Actions → Docker → Argo CD → Kubernetes) for a containerized microservice, using a two-repo pattern and Helm-templated manifests to enable automated, self-healing,
- **Wep portfolio:** Automated a serverless deployment pipeline for a high-performance Next.js portfolio, utilizing Terraform for cloud infrastructure provisioning and GitHub Actions for continuous delivery. [github](#)
- **Simple bookstore:** a backend application for a bookstore where i used the Express JS framework integrated with MongoDB as a database running on NodeJS engine (freelance) [github](#)
- **Github actions pipeline:** a workflow for testing a web app using GitHub actions that runs a test script (freelance) [github](#)
- **Web scraper:** a project collects all the scripts developed to scrape data from custom websites (freelance) [github](#)

CERTS

- Red Hat System Administration – I (RH124)

LANGUAGES

Arabic (Native) English (Proficient)
