

MOHAMMED HOSSAM

Cloud DevOps Engineer | Software Developer

Egypt | +201203903315 | eng.mohammed.hossam22@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Junior DevOps Engineer with a great background in computer science and software development with experience in Linux system administration, Bash scripting, and networking fundamentals, experienced with AWS, and DevOps tools including Jenkins, Docker and Kubernetes. Skilled in automating tasks, maintaining CI/CD pipelines, and collaborating in Agile teams. Passionate about learning from senior engineers and optimizing workflows and expanding in DevSecOps career.

SKILLS

Technical core skills

- **Containerization:** Docker, Kubernetes, Docker Swarm, Docker Compose
- **CI/CD:** Jenkins, GitHub Actions, Argo CD
- **Cloud platform:** AWS
- **Version control:** Git
- **Web development:** NodeJS, Express JS, Next JS, API development, agile methodology
- **Scripting:** Bash, Python (Automation), YAML
- **Data engineering:** web scrapping
- **OS:** Linux administration
- **Database:** MySQL, MongoDB
- **Programming:** C, C++, Java, Python
- **Additional skills:** Network infrastructure configuration and security, Web pentesting (OWASP Top 10), Embedded software development and hardware integration

Soft Skills

- **Communication:** Exceptional verbal and written communication skills to simplify complex information and facilitate productive team meetings
- **Problem-Solving:** Ability to analyze challenges critically and implement creative solutions that improve efficiency and reduce errors.
- **Rapid learner:** Highly flexible professional with a track record of quickly mastering new technologies
- **Team Collaboration:** A collaborative team player skilled at working across departments to achieve shared goals
- **Time Management:** Expert at prioritizing high-volume workloads and managing multiple deadlines simultaneously.

PROJECTS

- **Simple bookstore:** a backend application for a bookstore where i used the Express JS framework integrated with MongoDB as a database running on NodeJS engine (freelance) [github](#)
- **Github actions pipeline:** a workflow for testing a web app using GitHub actions that runs a test script (freelance) [github](#)
- **Web scrapper:** a project collects all the scripts developed to scrape data from custom websites (freelance) [github](#)

CERTS

- Red Hat System Administration – I (RH124)

EDUCATION

Bachelor of Computer Engineering

Suez Canal University, Egypt

Sep 2020 – Jul 2024

GPA: 3.01 / 4.0

- Coursework: Secure Software Development, Database Systems, Operating Systems, Embedded systems security
- Executed professional projects focused on full stack web application development and cloud engineering

LANGUAGES

Arabic (Native) English (Proficient)
